

Zero work-related accidents,
Zero occupational illnesses,
Zero non-recovered waste!

Every day, all of us in the Group are actively committed to pursuing the ambitious objectives of the Saint-Gobain EHS policy through the implementation of the following principles:

- ➔ respect for the law and for best management practices;
- ➔ management of all forms of risk;
- ➔ measurable priorities and performances, based upon particularly effective performance standards found in the Group for comparable sites;
- ➔ application of the EHS policy to outside contractors who are working on a Group site;
- ➔ continuous, responsible and open dialogue with our partners (public authorities, clients, suppliers, etc.).
