Sun Guard Screen

Controls the damaging effects of the sun

Your partner for innovative textiles

## Sun Guard FAQ

### What is the difference between Sun Guard 85 and Sun Guard 90?

The two products are manufactured with different constructions meaning that they each have different amounts of yarn per square inch. Sun Guard 90 has more yarns per square inch and therefore will block a higher % of the sun's rays.

### What % of the sun does each Sun Guard product block?

Sun Guard 90 which features a 40x40 weave blocks up to 85% while Sun Guard 85 which features a 54x18 weave blocks up to 75%.

### Because of the tighter weave, does Sun Guard block all airflow and light?

No, it doesn't. Sun Guard Screen cloths still contain a good amount of open area to allow for airflow and light filtering.

### What is new and improved about this product?

Sun Guard Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

## Protect you and your home from the sun's harmful rays with Saint-Gobain ADFORS Sun Guard Screen.

ADFORS Sun Guard Screen can help to control the damaging effects of the sun. By installing Sun Guard Screen, you can conserve energy by keeping rooms cooler and also curtail the fading of carpets, drapes and upholstery.

While filtering light and heat from the exterior, the unique weave used in ADFORS Sun Guard is also specifically designed for better visibility and no distortion from the interior. Sun Guard is available in 2 different styles – Sun Guard 85 and Sun Guard 90. Each style is tested for sun control using the ASTM 4028 standard. ADFORS is also leading the industry by making our full line of fiberglass screen ortho-phthalate free, ahead of industry standards.

### Features and benefits of Sun Guard Screen:

- Extremely tight fiberglass weave for greater protection from sun and insects
- Light filtering for greater heat reduction and less glare
- Increased energy conservation by lowering air conditioning costs
- Long-lasting, attractive exterior appearance while providing increased interior privacy

Each pre-cut DIY roll comes with simple step-by-step instructions for easy installation. ADFORS .140" spline is recommended for the best fit in a standard frame. Sun Guard is also available in multiple widths in 100' Contractor rolls.
